

# Professional Services

Introducing Professional Services, a smart, easy way to ensure your agency continues to get maximum benefit from your Homecare Homebase system. They say checkups make good medicine. It's especially true for the healthy functioning of your agency. Why seek a checkup? It's simple. Your Homecare Homebase system has been receiving regular quarterly updates. If your employees are unaware of, or unsure of how to use the added functionality, these potentially enriching upgrades are going to waste.

## The Professional Services team can help by:

- Checking in with your system remotely to ensure all functionality is active and working correctly
- Sitting with your end user(s) onsite, answering questions and auditing the way they use the HCHB solution for hands-on learning
- Conducting updated training on a variety of topics, filled with tips for getting the most out of the system
- Briefing executives on strategic opportunities within the agency dashboard and operational reports

And if you've seen some employee turnover, Professional Services can bring your new faces up to speed quickly.

You've invested in a tool that keeps getting better. Periodic checkups are the best way to be sure you continue to get full value. Your agency profits, your employees benefit, and the patients you serve can be sure of receiving your best.

It's just good medicine.
